## ACADEMIC EDUCATION

---

### University of Lorraine, Loria - Ph.D. Candidate

2020-On Going

Computer Science, Machine Learning, Speech Production

Thesis title: *Deep supervision of the vocal tract shape for articulatory synthesis of speech*

Extra-curricular activities:

- 4th International School on Deep Learning - Università Politecnica delle Marche, Universitat Rovira i Virgili & IRDTA, Las Palmas de Gran Canaria, Spain (July 2021)

### University of Campinas - Master of Science

2017-2019

Electrical Engineering, Machine Learning, Deep Learning

Dissertation title: *The Impact of Annotation Quality on Deep Learning for Skin Lesion Segmentation*

Extra-curricular activities:

- Summer School on Data Science for Document Analysis and Understanding - La Rochelle Université & Inria, France (July 2019)

### University of Campinas - Bachelor of Science

2017-2019

Electrical Engineering

Extra-curricular activities:

- Software Engineering Internship - Motorola Mobility, Jaguariúna, Brazil (2015 - 2016)
- Linear Analysis Lab Monitor - University of Campinas, Campinas, Brazil (1S2015)
- Academic Internship - Czech Technical University, Prague, Czech Republic (Jan - Feb 2015)
- Academic Internship - University of Campinas, Campinas, Brazil - Funded by PIBITI/CNPq (2014 - 2015)
- President of 3E Unicamp - Junior Enterprise, Campinas, Brazil (2013)

## PUBLICATIONS

---

Towards the Prediction of the Vocal Tract Shape from the Sequence of Phonemes to be Articulated

*Vinicius Ribeiro, Karyna Isaieva, Justine Leclerc, Pierre-André Vuissoz, Yves Laprie*

September 2021, INTERSPEECH 2021

Less is More: Sample Selection and Label Conditioning Improve Skin Lesion Segmentation

*Vinicius Ribeiro, Sandra Avila, Eduardo Valle*

June 2020, ISIC Skin Image Analysis Workshop @ CVPR 2020

Handling Inter-Annotator Agreement for Automated Skin Lesion Segmentation

*Vinicius Ribeiro, Sandra Avila, Eduardo Valle*

June 2019, arXiv e-prints

## PROFESSIONAL EXPERIENCES

---

### Loria

October 2020 - current

*Doctoral Researcher*

*Nancy, France*

- PhD Candidate at the Multispeech research team at Loria, under the supervision of Dr. Yves Laprie. My current work focuses on articulatory speech synthesis with the aid of deep neural networks.

**Dasa & Nexa Digital***Data Science Specialist*

October 2018 - October 2020

*São Paulo, Brazil*

- I joined Nexa Digital in October 2018 to help to build the data team from the beginning. Our goal was to structure the data in thousands of medical records in the PDF format. My work included developing the data infrastructure, building the high-performance data systems and pipelines in Python, and developing the machine learning and deep learning models, e.g., LSTMs, CNNs, Attention mechanisms, to understand the information available in the PDF file.
- By the end of 2019, the company was acquired by Dasa, the 5th largest medical diagnosis company in the world. I started working at the company's innovation lab with radiology images, e.g., MRIs, PET, CTs. Our goal was to improve the clinical daily tasks and the patient's lives with artificial intelligence, mainly with deep neural networks.

**iFood & Rapiddo Delivery***Data Science & Analytics*

November 2017 - October 2018

*São Paulo, Brazil*

- I joined Rapiddo Delivery in a trainee program organized by its investor, Movile. Working with different types of vehicles, the company provided a smart, fast, and safe platform to get anything delivered from one place to another. As part of the Data & Analytics team, I was responsible for designing models for all segments of our business, developing services for collecting and analyzing data and integrating the services with our platform in AWS. My main contribution was working on a dynamic pricing model that allowed the company to have a positive margin for the very first time in its history.
- At the beginning of 2018, Rapiddo was acquired by iFood, the leader in online food delivery in Brazil. After the M&A, I worked as a data scientist in the logistics team, providing intelligence behind our data. I also had the opportunity to lead and launch our mPOS system, one of our most strategic projects for the year of 2018. I was responsible for dealing with suppliers, the tech team, and all the stakeholders. As a result, I was the main responsible for increasing our demand by 30% in all cities we launched.

**Eldorado Research Institute***Junior Software Engineer*

May 2016 - November 2017

*Campinas, Brazil*

- At Eldorado, I worked at an international project for Motorola Mobility. We were responsible for developing software automation tools to help the engineering teams all over the world to be more productive. As a software engineer, I worked mainly with Python programming language at a team that integrated people from the US, Brazil, and India.

**LANGUAGES**

---

<b>Portuguese</b>	Native
<b>English</b>	Fluent
<b>French</b>	Intermediate

**TECHNICAL SKILLS**

---

<b>Programming</b>	Python
<b>Machine Learning</b>	Pytorch, Scikit Learn, Numpy
<b>Cloud Computing</b>	Amazon Web Services, Google Cloud Platform
<b>Databases</b>	SQL, NoSQL, Graph DBs
